

Wolf's Mission

Wolf will help you solve any of your steel based fabrication demands. We provide welding, boilermaker, engineering and fabrication services to support any large industry project or business enterprise. We are here to give you peace of mind that your fabrication and repairs requirements are met within a competitive budget, completed on time and to the highest standards of workmanship.

What Wolf is known for

Wolf is renowned first and foremost for its specialist earth-moving bucket fabrication & repair capability. However, our established customers ask us to do much more and consistently we do what is required to respond to their needs. For example, we erect structures, we build train locomotive cab bodies, and we refurbish and repair truck bodies. If there is steel and welding involved, we will do it. We take our work and your needs seriously and are highly responsive to the urgent demands of all our clients, any time of day and day of the week.

Wolf's Quality Statement

"Our mission is to be the leading non-OEM earth moving bucket fabricator and repair business in South Africa. We intend to be recognised as providers of world class earth moving buckets that are superior to any OEM product. Our onsite mobility services will increase our customer's competitiveness and significantly contribute to operational efficiencies. Customer loyalty and satisfaction are our primary goals, which we will guarantee by producing products reflecting quality workmanship, delivered within promised timelines and at less cost than an OEM. We are committed to comply with our Quality Management System and to empower our employees to initiate actions to ensure both quality and continual improvement in all that we do. We believe that insisting on quality and adhering to the principles of quality management are central to behavior that is seen as ethical and socially responsible."

About Us

Wolf is an owner run enterprise which is both BBBEE Status Level 2 and an ISO 9001:2015 accredited business. We specialise in earth moving bucket fabrication and repairs, providing onsite mobility support and workshop based project facilities. We also provide general engineering and fabrication services to any client where high quality steel welding is required. All our welders conform to the AWS D1.1:2015 welding standard.
